

September 24, 2008

I am writing to thank you for giving my house a superb energy audit. I found the money I spent on your services to be extremely well spent.

With the upcoming winter months and the ever escalating price of energy, coupled with the age of my house I thought it would be a good idea to enlist your services. Your knowledge of the inner and outer workings of the entire house was much greater than I anticipated. I was also truly appreciative of the fact you did not have a "hidden agenda" of other services you were looking to sell (I believe, however, you do offer other services and would certainly recommend people using you for them if they are not handy enough to perform your suggested repairs). I was also excited that you spent a great amount of time analyzing my home and took extra time to explain to me not only what needed to be done to make my house more efficient, but since I am a big "DIY" homeowner you also included in your discussions with me the proper techniques for accomplishing the repairs.

Per your recommendation, I have already begun sealing my forced air duct work and I will be working on many of your other suggestions in the coming weeks. Additionally, I know you mentioned that you do provide other services and if I feel that any of the suggested tasks are out of my DIY "comfort level" you can be assured I will contact you.

I had done a lot of research prior to contacting you regarding making my house more efficient, but even some of the areas I already knew about you were able to supply additional information on actually how to best correct the affected areas. I will most certainly recommend your services to people I know and please feel free to use my letter as a testimonial to your excellent services.

Best regards,
